

WeDrive FAQ

Why did you create this marketplace?

We know how uncomfortable being confined to stuffy showrooms with salespeople and clinicians can be, and we believe people who need mobility devices are consumers, not 'patients'! WeDrive was created to eliminate the conventional restricted and pressured buying experience by enabling a community of users to connect with WHILL-curious consumers to share authentic stories and experiences of driving a state-of-the-art WHILL Personal EV.

Can I post a test drive if I don't own a WHILL product?

At this time, posting WeDrive listings are only open to WHILL product owners and Ambassadors (aka: our Community Drivers). But fear not, in the future we'll be opening this marketplace for non-WHILL Personal EV owners to post test drives. Send us an email at info@whill.us and we'll notify you once it's open to everyone.

Do I have to pay a fee for a test drive?

Nope—it's absolutely free! Plus, after your test drive, you'll receive a promo code for 5% off on your very own Model A or Model M!

What if there is no Community Driver in my area to do a test drive?

If there isn't a Community Driver in your area, don't fret. We're hard at work signing up more Community Drivers nationwide. Please email us at info@whill.us to let us know where you're located so we can focus our efforts in your area.

How do I schedule a test drive with a Community Driver?

It's super easy, here's what you need to do:

- Create a WeDrive account using your email or Facebook account.
- Enter your address or zip code in the search box to locate a Community Driver near you.
- Choose your favorite Community Driver profile—you can filter options by using the filter tool in the left sidebar. Make sure the Community Driver you select has a Personal EV that is configured to your needs. (e.g. similar height and controller location)
- Click on "Schedule" and let the Community Driver know you're interested in a test drive

What's the difference between Model A and Model M?

Great question! You can view our model comparison sheet [here](#).

The WHILL Model A is not considered a medical device and has not been submitted to the Food and Drug Administration for review or clearance. While Federal law restricts Model M to sale by or on the order of a physician, requiring a prescription.

Can I still test drive a Model A even though I need a Model M?

Model M is for non-ambulatory users and has specific features for people who require a wheelchair. Model A is for personal mobility and people who do not require a wheelchair (e.g. seniors). Please choose a model to test drive that best suit your needs.
